

TOWING

If your vehicle has been towed, contact the Service de police de l'agglomération de Longueuil (SPAL), at 450 463-7011, to locate your vehicle.

ADDITIONAL PARKING SPACES

In order to avoid having to move your vehicle, or if you want to park your vehicle safely during snow removal operations, consult the list of locations where you are permitted to park a vehicle between November 15 and April 15, at brossard.ca/deneigement.

DAMAGES

If you notice damage to your property (lawn, hedge, fence or other) caused by snow removal operations in Brossard, you must file a claim with the City, before May 15 of the following Spring by contacting Services Brossard, at 450 923-6311 or at services@brossard.ca.

Depending on the type of damage, the repair work will be carried out during the summer.

INFO-NEIGE

During snow removal operations, parking prohibitions may be in force.

To find out whether a parking prohibition is in force, call **450 923-6339** or visit brossard.ca/deneigement.

Before giving a contract to a snow removal company, make sure they hold a valid snow removal permit issued by the City.

THE SNOW REMOVAL PERMIT: IT'S MANDATORY!

Any person or company that offers snow removal services to an individual must first obtain a permit. The permit is issued by Services Brossard, located at 2001, boulevard de Rome.

SNOW REMOVAL OPERATIONS:
YOUR SAFETY COMES FIRST!

SNOW REMOVAL IS A TEAM EFFORT!

To ensure safe travel for pedestrians, motorists and emergency vehicles, the City plans and coordinates its snow removal operations.

SNOW REMOVAL IN FOUR STEPS

1) Spreading

Each snowfall is analyzed to ensure that the right decisions are taken for the type of precipitation road users must face (snow, sleet, freezing rain).

The spreading of abrasives and de-icers begins when there is apparent snow accumulation or ice formation on the ground.

2) Snow Clearing

Continuous snow clearing takes place on walkways, sidewalks, residential streets, collector streets, main arteries and boulevards when the accumulated precipitation reaches 5 cm.

3) Signage

In preparation for snow removal, "TOWING ZONE" posters are planted on snowbanks to indicate that parking in the street is prohibited between 6 p.m. and 8 a.m

4) Snow Removal

Snow removal operations begin when accumulations on the ground reaches 10 cm, or at the end of a snowfall of more than 10 cm. Snow is first removed from boulevards, collector streets, crowded local streets, high density sectors and residential streets with one or two sidewalks

RUES ÉCO-HIVERNALES

The City has adopted the principle of rues éco-hivernales (eco-friendly winter roads), so on level 3 residential streets, no de-icing salt will be used. Directly linked to sustainable development, the principle of rues éco-hivernales aims to reduce the environmental footprint left by snow and ice removal. Various abrasives will be used to ensure the safety of users. You can view the plans for rues éco-hivernales at brossard.ca/deneigement.

DURING SNOW REMOVAL OPERATIONS, BE PART OF THE TEAM!

To ensure everyone's safety on public roads throughout the City, it is important to remember:

- Do not shovel snow onto the street, along the edge of the street or on the sidewalk during residential snow removal;
- Do not place snow near a fire hydrant, because this constitutes a danger for fire safety;
- Do not place garbage or recycling bins in the street or on the sidewalk;
- Make sure you respect the regulations by installing your car shelter at least 2 m from the road surface;
- You must prune your trees, shrubs and hedges that encroach on public ways (sidewalks and roadways) or that obscure signs;
- Remove the accumulated snow from your driveway without shoveling snow onto the street;
- Protect your fences, shrubs, etc. well in anticipation of snow that may be blown onto your property during snow removal operations.

PRIORITIES

- Level 1**
Main arteries and boulevards
- Level 2**
Collector streets, busy local streets and high density sectors
- Level 3**
Residential streets
